

About Us.....

Eve, Barrie and Ed were just breaking blues ground as the pandemic hit , but after a few line -up changes they were still so fired up and passionate about their music that nothing much could get in their way. So, with only online jams, virtual sessions and distant recordings to keep them going, all things virtual just had to be enough for a while.

But as soon as it was possible, they invited Mark a solid but fiery drummer and talented keys man George to join them and word began to spread.

Fast forward to 2025 and whilst they plan to develop some original material, their set list has grown much longer and broader and includes many timeless blues standards as well as some lesser known tunes all performed with that classic Blues on Fire passion.

Eve's bluesy vocals continue to be complemented by Barrie's sublime blues rock guitar style as well as the deep humming bass from Ed as George and Mark on keys and drums respectively add their individual distinctiveness to make this a truly impressive 5- piece band.

Powerful and raunchy, they share a common love of rock and blues, each member is a talented and accomplished musician in their own right, with a wealth of gigging experience. Everything they play is based in Blues and covers a mix of Blues and Blues Rock from Muddy Waters, Eric Clapton and Bonnie Raitt to Etta James, Chuck Berry, Joe Cocker, and Gary Moore as well as many other great artists.

The band continue their mission to spread their own personal brand and style of blues music and to entertain their audiences wherever they go.

Comment from the Band ...

"We love adding our own take on some timeless rock and blues classics and so most will sound a little different. So don't expect the same old covers, our set features a wide spectrum of music, you might have heard some of them before, you might even know a few of the lyrics, but you can be certain that we'll have you tapping your feet and desperate to play that air guitar or piano before the night is done"

Eve Barrie Ed Mark George
